

### Coaster Call®

- Rechargeable NiMH battery
- Customizable labels available
- Patented stack charging
- Durable rubber bumper
- Three colors available

### Alphanumeric Coaster

- 250 character LCD display
- Rechargeable NiMH battery
- Multiple alert modes
- Patented stack charging
- Durable rubber bumper
- Two colors available

### Adver-Teaser®

- Rechargeable NiMH battery
- Only pager on the market with a double-sided space for promotional inserts
- Four-message light notification
- One-piece construction means no broken handles

## Patient & Family Paging

### Patient Paging

Long Range Systems (LRS) has been helping medical facilities provide quality patient care for almost 15 years with our on-site paging systems. These pagers, help streamline patient flow, improve staff efficiency and eliminate intrusive over-head paging.

The also help healthcare facilities adhere to HIPAA regulations requiring patient confidentiality. Just hand a pager to a patient when they check in and it'll flash silently when the physician, nurse or administrator is ready to see them.

LRS pagers are ideal for any facility and department, including:

- |                   |                    |              |
|-------------------|--------------------|--------------|
| • Hospitals       | • Day Surgery      | • Radiology  |
| • Medical Offices | • Emergency Room   | • Pharmacy   |
| • Admissions      | • Physical Therapy | • Laboratory |

### Family Paging

Give family members peace-of-mind. With LRS pagers, they don't have to stay in the waiting area. They can visit the cafeteria, gift shop, chapel or other areas and still know they can be reached instantly if needed.

Being able to find family members quickly also helps improves staff response time when caring for a patient. If a physician or nurse needs to consult someone, they just send a silent page instead of waiting for them to return or searching for them. This is especially important in critical or emergency situations when a few minutes could mean the difference between life and death.
